PROFESSIONAL SUMMARY

Computer Systems Engineering student at Palestine Technical University – Kadoorie (PTUK) with strong foundations in **Algorithms, Data Structures, and Backend Development**. Proficient in **Java (OOP) and Python**, with practical experience in **Linux system administration, network security**, and **AI fundamentals** including image analysis and object recognition. Skilled in technical writing and documentation. Highly motivated to contribute analytical and engineering skills to innovative software, AI, and security projects.

TECHNICAL SKILLS

- **Programming Languages:** Java (Advanced OOP), Python, C++, Shell Scripting.
- **Computer Science Fundamentals:** Data Structures (Stacks, Queues, Trees), Algorithms, OOP Principles.
- **AI & Computer Vision:** Image Analysis, Object Recognition, Practical AI Frameworks.
- **Systems & Networking:** Linux/Windows, Network Protocols, Client-Server Architecture, IP Addressing.
- **Tools & Databases:** Git, GitHub, SQL (Database Design & Query Optimization).
- **Core Skills:** Technical Writing, Analytical Thinking, Problem Solving, Team Leadership.

KEY ACHIEVEMENTS

- **Code Optimization:** Reduced runtime errors by **15%** in Java applications through rigorous debugging and iterative testing.
- **Database Efficiency:** Enhanced data retrieval speed by **20%** via optimized SQL queries and schema design.
- **Task Automation:** Streamlined file management and system administration using Shell Scripting, saving approximately **30 minutes** per session.
- **Technical Documentation:** Documented complex project workflows and system architectures ensuring **100% reproducibility**.

SELECTED PROJECTS & ACADEMIC WORK

Software Development & AI Research

- Designed and implemented modular software components in Java, focusing on memory efficiency and clean backend logic.
- Applied AI algorithms for **image classification and object detection** tasks as part of specialized AI coursework.
- Developed a university SQL database system to manage student records, ensuring data integrity and security.

Networking & Security Operations

- Configured and optimized network setups with routers and switches, implementing secure user permissions for client-server environments.
- Monitored network performance and diagnosed connectivity issues to maintain high system reliability.

Technical Training & Bootcamps

- **Software Development Bootcamp (2025):** Hands-on training in Git Bash and real-world project workflows.
- **Udacity Certifications:** Completed projects in **AI Fundamentals**, Python, HTML, and CSS, demonstrating a commitment to continuous learning.

EDUCATION

Bachelor of Computer Systems Engineering *Palestine Technical University – Kadoorie (PTUK)* | **Expected Graduation: 2027** * **Relevant Coursework:** Data Structures & Algorithms, Operating Systems, Networking, Database Design.

High School Diploma (Tawjihi) *Vocational Computer Track* * Focused on foundational programming and computer systems logic.

JUSTIFICATION STATEMENT

"I selected VallumFlow's internship because it emphasizes computer science fundamentals, AI, and software security—areas directly aligned with my Computer Systems Engineering studies. I optimized this resume to highlight my skills in **Algorithms, Python, and AI Fundamentals**, alongside quantifiable achievements in **code optimization and technical documentation**, demonstrating my readiness to contribute effectively to autonomous security research."
